PROFESSIONAL SUMMARY

Java Full Stack Developer with over 2 years of hands-on experience in building scalable, secure web applications using Java, Spring Boot, ReactJS, and MySQL. Holds a Master's degree in Cybersecurity from Coventry University, with a strong focus on integrating advanced security practices into application development. Well-versed in implementing authentication, authorization, and secure coding standards to safeguard application integrity. Additionally, familiar with AI technologies, leveraging automation and intelligent systems to boost development productivity and reduce turnaround time. Combines full-stack expertise with cybersecurity and AI knowledge to deliver high-performance, future-ready software solutions.

PROFESSIONAL EXPERIENCE

Java Full Stack Developer

RoyalCyber Pvt. Ltd, Hyderabad

March 2022 – November 2022

- Developed secure RESTful APIs using Spring Boot and integrated them with frontend modules.
- Implemented JWT and role-based access control mechanisms.
- Collaborated with frontend and QA teams to ensure full integration and testing.
- Used Git for version control.

Software Engineer Intern

Futzen ETechnologies Pvt Ltd, Hyderabad

August 2021 – February 2022

- Contributed to backend development using Java and Spring Boot.
- Helped in writing reusable components and resolving production bugs.
- Involved in Agile sprints and bug tracking.

SKILLS

- **Languages:** Java, SQL, HTML, JavaScript
- **Frameworks:** Spring Boot, Hibernate, JPA
- **Frontend:** ReactJS, Bootstrap, JSP
- **Web Technologies:** REST APIs, JSP, Servlets
- **Databases:** MySQL, PostgreSQL
- **Authentication:** JWT, OAuth 2.0, Supabase Auth
- **Tools:** Git, Maven, Eclipse, IntelliJ IDEA, Splunk
- **Methodologies:** Agile, Scrum
- **Security:** CEH, OWASP Top 10, Secure coding practices
- **Other:** AI integration knowledge for automation

PROJECTS

Secure ECommerce – Enhancing E-commerce Security with Advanced Authentication

- Built a secure eCommerce platform using Java Spring Boot, MySQL, and Angular.
- Implemented Google OAuth 2.0, JWT-based authentication, and password hashing.
- Utilized Splunk for real-time log tracking and threat detection.
- Followed Agile methodology for iterative feature development and teamwork.

Smart Legal Helper – AI-Powered Legal Assistant Website (Personal Project)

- A full-stack legal research platform that helps advocates access case precedents, law updates, and winning strategies.
- Developed frontend using ReactJS, with user authentication and backend managed via Supabase.
- Integrated an AI chatbot to answer legal questions instantly using LLM-based APIs.
- Designed for improved legal productivity and real-time awareness of law changes.

Library Management Website

- Developed a complete library management system using Java, Spring Boot, and MySQL.
- Features included book issue/return, user registration, admin panel, and overdue fine calculation.
- Implemented MVC architecture and CRUD operations for smooth backend functionality.
- Added responsive UI using JSP and Bootstrap for enhanced user experience.

EDUCATION

Master of Science (MSc) in Cybersecurity

Coventry University, UK

July 2023 – November 2024

CERTIFICATIONS

Certified Ethical Hacker (CEH) – EC-Council
